- Outcomes
- Rotating Hinge
- Dealing with the Stiff Knee
- Patella Instability in Flexion

ORTHOPAEDICS – THIS IS YOUR LIFE

Airport Hilton Hotel, Melbourne, 15 – 16 July 2010

Convener: Richard Williams

The July 2010 COE will be “a short, sharp meeting”. Attendees will fly in on Thursday lunchtime and work hard and continuously until 5.00pm on Friday afternoon. They can then fly out and expect to have a relaxing weekend with their families.

The program will deal with what it really means to be an orthopaedic surgeon. Social, recreational, remunerative and professional aspects will be covered in a thought-provoking and insightful fashion. Carefully chosen speakers will explore such issues such as money and finance, litigation and passion. The passion will not be just the “after-five” type. We will also talk about the difficulties experienced with dealing with administrative bodies, legislative councils and jurisdictional bureaucrats. Anger, frustration, skill, guile and cunning will all be canvassed.

There will also be a liberal sprinkling of “hot clinical topics” to keep you abreast of current issues and future trends. This will be a meeting for all orthopaedic surgeons to share.

Travel will be minimised and costs contained. We will bunker down for 36 hours of education, excitement, entertainment and excellent food with wine. We are aiming to make this the best COE ever!
